SKILLS

- Adept in React, Vue, Node.js, TypeScript, AI agent automation, Python, Java, Express.js, SQL, MongoDB, REST APIs, DevOps, React Native, and more.
- Experienced in scalable AWS and Google Cloud Platform stacks and server architecture.
- Fluent with version control in Git, GitHub, GitLab, Bitbucket, and GitHub CLI.
- Confident delivering results with Google Workspace and Microsoft Office suites.

EXPERIENCE

Matrix Group International, Hybrid – *Contract Frontend Developer (Summer 2026)*

MAY 2026 – AUGUST 2026

- Led development of a custom WordPress plugin, leveraging Vue for complex UI needs.
- Created, managed, and monitored AWS Lambdas (Python), an API Gateway, and S3 buckets using a CloudFormation IaC project in a full-stack AWS Personalize implementation.
- Demoed to clients, documenting and implementing their feedback throughout development.

MARi, Remote – *Agentic Workflow Engineer Team Lead (2025)*

MAR 2025 – MAY 2026

- Reduced an internal workflow's time cost by 94% by creating and deploying a custom AI agent automation solution with Google ADK (Python), n8n, and Google Cloud Platform.
- Wrote a React-TypeScript software tour from scratch for a production SaaS codebase.
- Managed a team of interns creating client-facing AI agent systems using Google ADK, n8n, React, Express.js, and PostgreSQL with agile development methodologies.

All Points Broadband, Richmond, VA – *Paid Intern, Information Systems*

MAY 2025 – AUGUST 2025

- Created a ZIP code-based internet coverage search for thousands of customers visiting the marketing site's homepage and migrated the site with MySQL and WordPress.
- Created a WordPress plugin using PHP, JS, and CSS to create custom Elementor widgets.
- Reduced friction in sales workflows by developing multiple custom ServiceNow applications in JavaScript as a ServiceNow administrator and application developer.

PROJECTS

- Capstone Project with Bank of America – Stronger Than You Think (React, TypeScript, MySQL, Google Cloud Platform) – a fundraising platform supporting Paralympic athletes.
- Research with Luke Gusukuma, Ph.D. – JPedal (Java, Gradle, JUnit Jupiter) – a deterministic auto-grading library for educators assessing Java code.
- Equanimity (React, MongoDB, Express, TypeScript) – a web app that gives users insights into how their diet affects their mood and behavior.

EDUCATION

Virginia Commonwealth University, Richmond, VA – *Bachelor of Science in Computer Science | Concentration: Software Engineering | Minor: Data Science*

AUGUST 2024 – MAY 2027

Activities and Societies:

Indoor Climbing Club (Treasurer), Emerging Leaders Program, Activities Programming Board
